

A Constituents' Service Request to our Representative:
A New Deal for Main Street and Reform for Wall Street!

Dear Representative:

Last week we were a part of the movement against a bailout for Wall Street. This week, we're asking you to join us in strengthening the proposals pending before Congress and push for a New Deal for Main Street.

Here is a simple, unified message from the constituents that you represent

Congress must craft and pass legislation that makes mandatory these basic and fair principles:

Bankruptcy Protection for Homeowners

- Legislation must provide help for homeowners struggling to stay in their homes.

A Strong Economic Recovery Package

- Congress must pass a strong economic recovery package that will "bail out" American families by creating jobs, provide a lifeline to those in need and jumpstart the real economy.

Taxpayer Investment Protection

- Taxpayer investment in our financial institutions must be vigorously protected with independent regulation and oversight. Profits must first be returned to the taxpayers.

Strict Limitations on Executive Compensation

- Tax dollars should be forbidden from funding excessive executive compensation and golden parachutes.

Sincerely,

The People on Main Street
